

Scala For DS- Practical No.14

Roll No. : 55	Name: SUNNYYADAV
Class : SYIT	Date/Time of Submission:

1.Perform basic time series analysis in Scala. Generate synthetic time series data (e.g., daily sales over a month).

Input:

```
import scala.util.Random
object Scala14 extends App {

    println("Day\tSales")

    for (day <- 1 to 30) {
        val sales = 50 + day * 2 + Random.nextInt(10) - 5
        println(s"$day\t$sales")
    }
}
```

Output:

Day	Sales
-----	-------

1	52
---	----

2	51
---	----

3	52
---	----

4	62
---	----

5	58
---	----

6	60
---	----

7	65
---	----

8	66
---	----

9	69
---	----

10	72
----	----

11	76
----	----

12	70
----	----

13	71
----	----

14	80
----	----

15	79
----	----

16	83
----	----

17	81
----	----

18	84
----	----

19	85
----	----

20	94
----	----

21	87
----	----

22	93
----	----

23	91
----	----

24	99
